Pure Kush

[Buy now](#)

Pure Kush marijuana seeds are created with 100% pure indica landrace genetics from the Hindu Kush, which is easy to grow and oh so satisfying to smoke. Its pure genetics make it incredibly potent, the plant itself is robust and has a great tolerance level which makes them ideal for those new to growing cannabis. When grown outdoors expect good quality crops of up to 700g per plant, but it's when you are growing this weed indoors that the plant comes into its own producing up to 550g/m² of the most potent, couch lock Kush you will ever have the joy to experience.

Stinkin' Bishop

[Buy now](#)

Stinkin' Bishop is a special blend of Afghan Kush x Super Skunk producing the most pungent dank weed seeds. The smoke is incredible with an outstanding flavour of pungent skunk and spicy, extra strong mature cheese. THC levels are high and the effect is well balanced creating a mental and body relaxation with a remarkable alleviation of pain, stress and depression. Particularly suited to indoor set ups but also thriving well outdoors producing a substantial harvest that both the professional and amateur growers alike can easily achieve. The weed is outstanding, break open the buds ready for use and you'll see why, the stench will make your eyes water!

White Critical

BUY NOW

White Critical is bred with the commercial grower in mind for yield and potency but equally these seeds are also a perfect choice for the smaller grower looking to produce coffee shop grade that may well end up being their preferred headstash. Easy to control within indoor set ups and with a short flowering period of just 50 to 55 days White Critical plants are ripe for harvesting voluminous buds which ooze with adhesive like resin. Outdoors she's unfailing due to her high resistancy to pests and mildew, ready to harvest in the final weeks of September / early October every plant is capable of producing up to a kilo of dank narcotic weed.

Cali USA Fems

Alien Gorilla

BUY NOW

Gorilla Glue #4 has reached legendary status in the world of cannabis strains. Alien Technology has it's own unique story and was created by making selections from a handful of landrace seeds being acquired from a US soldier returning from Afghanistan. From these powerhouses in terms of potency and THC production, Alien Gorilla was born. Alien Gorilla boasts premium genetic parentage and produces spectacular buds laden with extreme THC after around 65 days flowering. Alien Gorilla is an Indica dominant strain which gives a balanced physical and relaxing high.

Blueberry Ghost OG

BUY NOW

Two legendary strains combine to produce this very special strain. We've used a monster Blueberry (Blue Monster) with a deep kushy fruity flavor and added some acidic fruit into the mix with the Colorado Ghost OG and hail the blue titan... Blueberry Ghost OG. Blueberry Ghost OG is an amazing accomplishment, try for yourself. In just 8 – 9 weeks of flowering this lady will bring in a massive haul of monstrous fat buds loaded with gleaming resin crystals with high levels of THC. Yields are big indoors: 500–550g/m², whilst outdoors given the right conditions double could be achieved.

Bruce Banner #3 Fast

BUY NOW

Bruce Banner #3 Fast is one of the easiest strains in our Cali range to grow. Bruce Banner #3 Fast produces comparable levels of potency and yield with a shorter flowering period which is great news for both indoor and outdoor growers alike. A little shorter and stockier with tighter internodal spacing than its big monster relative, robust with a high tolerance level especially when growing outdoor as the early September harvest makes this titan less prone to the natural elements that can affect a crop especially toward the end of the grow cycle. For the more experienced grower training methods such as scrog and sog methods can be adapted.

Kush Mintz Fast

BUY NOW

Kush Mintz Fast from Original Sensible Seeds is one of the most productive and rewarding fast flowering cannabis strains out there. Animal Mintz x Bubba Kush x Original Sensible Secret Hybrid creates a high THC cannabis strain with rapid flowering time. An indoor flowering period of only 50 days creates strong robust plants with an outstanding production of dark dense buds with a mouthwatering cookie mint flavour. The hardness and density of the buds together with the early flowering period means Kush Mintz Fast is extremely resilient against disease and pests. Outdoor harvest time is in the first weeks of September helps to avoid any adverse weather conditions that could damage crops. This infusion of minty menthol Kush creates a happy relaxed effect and is a must have strain for all cannabis enthusiasts.

Auto Ghost OG

[Buy now](#)

Auto OG Kush just got even better with the addition of Colorado Ghost OG. In this new and improved version of our Auto OG Kush we used the Colorado Ghost cut, improving the taste, flavor and effect. The only aspect that remains the same is the simplicity to grow. Even a novice grower will be able to produce top quality THC crystal packed nuggets in less than 75 days from seed to harvest which are both stimulating and relaxing. The taste and aroma remains seductive and earthy but with a more heavier citrus and piney background delivering a powerful body stone with a happy euphoric effect leading to a dreamy relaxation with the power to alleviate stress, anxiety and sleep issues.

Black Dog Auto

[Buy now](#)

Black Dog Auto from Original Sensible Seeds is a combination of two classic Cali strains Blackberry Kush and Headband. Combined with our super auto genetics Black Dog Auto produces an autoflowering variety like no other. From start to finish 60 days flashes by to harvest a fruitful crop that is something quite special. Black Dog Auto is an indica dominant strain producing dark, dank robust plants. In amongst its dank dark almost black leaves are sticky syrupy buds with a distinct aroma of juicy grape and berries that produce a heavy sedative effect perfect for chill-out days or night time relaxing. This is a very forgiving strain that suits all conditions and growers, the yields are notably high and the fruity grape berry flavours with nutty undertone deliver the strength and power expected of a hard hitting indica.

Grape Soda Auto

[Buy now](#)

Grape Soda Auto from Original Sensible Seeds has a quite an exquisite terpene profile with a pungent citrus flavour with hints of grape. A heavy indica strain with a well balanced tranquillizing effect that will hit hard. Grape Soda Auto produces compact, robust plants clusters of jewel like buds which are extremely dense and ooze sticky THC trichomes. These dank buds can produce a colourful wash of purple hues toward end of flowering period creating a powerful citrus aroma with the berry background. Easy to grow and undeniably rewarding in just 70 days Grape Soda Auto can produce a rich harvest of up to 150g per plant. This is autoflowering cannabis in its most extreme and powerful form and a must-have for all marijuana enthusiasts.

CannaBoom CBD+

BUY NOW

Our analysis shows CannaBoom CBD+ seeds can be compliant and legal to grow in some countries due to their low THC content. CannaBoom CBD+ not only has minimum THC and high CBD level, these seeds also benefit from a small percentage of CBG. CannaBoom CBD+ is recommended for growing outdoor only and plants can grow tall. With a flowering period of 9 - 10 weeks, harvesting outdoor is around the month of October and the rewards are impressive, depending on growing conditions 800g per plant is easily produced whilst 1kg per plant is not unachievable.

Dr Bruce Banner CBD

BUY NOW

Bruce Banner #3 is one of the biggest hitters in the world of cannabis strains whilst in contrast Carmen has very low levels of THC. But despite the low levels of THC, Carmen has a fantastic flavour profile and very high levels of CBD. By crossing these two varieties of contrasting cannabinoids we have created Dr. Bruce Banner, a 1:1 THC:CBD of around 10%. Dr. Bruce Banner is an important cannabis hybrid for medicinal purposes and is ready to harvest after 60 to 70 days of flowering. The effect is a strong balanced physical relaxant. Yields of 500g/m² can be achieved of 1:1 THC:CBD sweet fruity mandarin buds with citric notes.
